Art Unit: 1761

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant does not teach what is encompassed by “substantially free of added proteins, and hydrocolloids” or specifically “high potency non-nutritive carbohydrate sweetening agent.”

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-31, 33-41, and 43-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Amen et al (US 4851239) in view of Norris (US 3671459) and Jackson (WO 81/00061) for the reasons set forth in rejecting the claims in the last Office action. The amendments to the claims are not seen to influence the conclusion of unpatentability previously set forth.

Art Unit: 1761

Amen et al disclose a shelf-stable aerated yogurt comprising milk ingredients, an emulsifier, gelatin, a starter culture, and conventional components (see entire document).

The claims differ as to the specific use of a hydrated emulsifier.

Norris discloses the conventional use of a hydrated emulsifier in food products (see entire document t).

Jackson discloses the conventional use of a hydrated emulsifier in food products (see entire document).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the hydrated emulsifiers as taught by Norris and Jackson in that of Amen et al as the use of a hydrated emulsifier is conventional in the art and merely a matter of choice.

Applicant's arguments filed April 2, 2004 have been fully considered but they are not persuasive.

Applicant argues that Amen et al teach away and that the references are not combinable.

Amen et al disclose a shelf-stable aerated yogurt comprising milk ingredients, an emulsifier, gelatin, a starter culture, and conventional components (see entire document). Applicant claims product claims. The process limitations (e.g., time of addition) are not patentable distinctions.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be

Art Unit: 1761

established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, all of the references disclose the conventional use of emulsifiers in the food art.

In the absence of a showing to the contrary Applicant uses known components to obtain no more than expected results.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
